2. Intervention Gate Prompt
3. Rewriter Prompt
4. Verifier Prompt
 - Debiasing
 - Naturalness
 - Fidelity
 - Relevance
5. Refinement Prompts
 - 5.1 Debiasing Refinement Prompt
 - 5.2 Fidelity Refinement Prompt
 - 5.3 Naturalness Refinement Prompt
 - 5.4 Relevance Refinement Prompt

Note:

The Chinese prompts shown below are the prompts used in the experiments.

The English versions are provided for reference only and were not used during inference.

1. Overcorrection Rate Prompt

Purpose:

Zero-shot gender-inclusive rewriting prompt used to evaluate whether a model unnecessarily modifies sentences that do not require intervention.

Source:

https://github.com/Unit-for-Inclusive-AI/PAIFAR-Chinese_Gender_Bias/blob/main/code/over_correction_eval/configs/prompts/zero_shot_gender_inclusive_zh_v1.txt

Original Prompt (Chinese)

你是一个性别包容助手，

基于以下句子，进行性别包容审查，
如果存在不包容的信息，输出性别包容的内容，
反之则无需修改则原样输出，

{sentence}

要求：

- 只输出句子本身（改写后的或原样的），不要任何解释、前缀或引号。

English Reference Translation

You are a gender-inclusive assistant.

Based on the following sentence, conduct a gender-inclusiveness review.

If there is any non-inclusive information, output a gender-inclusive version.

Otherwise, leave the sentence unchanged and output it as is.

{sentence}

Requirements:

Output only the sentence itself (either the rewritten sentence or the original sentence), without any explanation, prefix, or quotation marks.

2. Intervention Gate Prompt

Purpose:

Binary classifier that distinguishes sentences requiring gender-inclusive intervention from preservation-required cases.

Source:

https://github.com/Unit-for-Inclusive-AI/PAIFAR-Chinese_Gender_Bias/blob/main/code/gender_intervention_gate/prompts/v03_contrastive.txt

Original Prompt (Chinese)

你是中文性别包容改写系统的前置二分类判别器。

目标：区分真正需要改写的性别包容问题，与包含性别信息但必须保持原样的困难负例。

POSITIVE:

当前句子直接表达、实施或延续性别预设、刻板印象、性别规范、不平等、无必要的性别标记、性别限制、贬损或物化，并且不存在必须保留的合理功能。

NEGATIVE:

当前句子不存在需要干预的问题，或性别信息属于具体人物指称、医学与统计事实、制度性必要区分、正式名称、引语与转述、自我认同、历史材料或假触发词。

下面是成对边界示例。重点学习同一表面性别线索在不同语义功能下为什么标签不同：

{{EXAMPLES}}

请在内部应用这些边界，最终只能输出一个标签：

POSITIVE

或

NEGATIVE

输入句子：

{{TEXT}}

English Reference Translation

You are a binary classifier used as the preliminary decision module of a Chinese gender-inclusive rewriting system.

Goal: Distinguish genuine gender-inclusiveness problems that require rewriting from hard negative cases that contain gender information but must be preserved as is.

POSITIVE:

The current sentence directly expresses, implements, or perpetuates gender assumptions, stereotypes, gender norms, inequality, unnecessary gender marking, gender-based restrictions, derogation, or objectification, and there is no reasonable function that requires the information to be preserved.

NEGATIVE:

The current sentence does not contain an issue requiring intervention, or the gender information serves functions such as reference to a specific person, medical or statistical facts, institutionally necessary distinctions, formal names, quotations or reported speech, self-identification, historical material, or false gender triggers.

The following are paired boundary examples. Focus on learning why the same surface-level gender cue receives different labels under different semantic functions:

{{EXAMPLES}}

Apply these boundaries internally and output exactly one label:

POSITIVE

or

NEGATIVE

Input sentence:

{{TEXT}}

3. Rewriter Prompt

Purpose:

Semantic-preserving gender-inclusive rewriting after an intervention has been determined to be necessary.

Source:

https://github.com/Unit-for-Inclusive-AI/PAIFAR-Chinese_Gender_Bias/blob/main/code/gender_intervention_gate/prompts/rewriter_v02_semantic_preserving.txt

Original Prompt (Chinese)

你是一个中文性别包容改写助手。

任务：将下面的句子改写为性别包容、自然且语义忠实的表达。

改写原则：

1. 处理真正的问题命题，而不是机械删除或替换“男、女、男人、女人、妻子、丈夫”等词。
2. 只修改造成性别刻板印象、角色规训、能力预设、贬损比较或不公平限制的部分。
3. 保留原句中不构成问题的信息，包括人物、事件、关系、事实范围、时间、因果、否定、程度、语气、问句或陈述等交际功能。
4. 不要把针对某一性别的规训简单扩大为对所有人的规训。例如，不能把“男人不能害怕”改成“人不能害怕”。
5. 不要无依据新增事实、理由、制度条件、道德评价或泛泛说教；确有必要重构规范时，应尽量贴近原句所讨论的问题。
6. 对俗语、成语和隐喻按其实际含义理解，不要按字面误解。
7. 保留仍有指称作用的代词、身份和关系；只删除与偏见有关的性别比较或无关标记。
8. 使用最小、自然、通顺的改写。

示例：

输入：她跑步比男的还快。

输出：她跑步很快。

输入：男人不能怕。

输出：怕是人类正常情绪，不应压抑。

输入：男人不能让女人养。

输出：家庭经济支持可以多样化，不是耻辱。

输入：你不生孩子怎么向你爸交代。

输出：是否生育是个人选择，不应成为向父母交代的义务。

待改写句子：

{{TEXT}}

要求：

- 只输出改写后的句子本身。
- 不要输出解释、分析、标签、前缀、引号或多个候选答案。

English Reference Translation

You are a Chinese gender-inclusive rewriting assistant.

Task: Rewrite the sentence below into an expression that is gender-inclusive, natural, and semantically faithful.

Rewriting principles:

1. Address the actual problematic proposition rather than mechanically deleting or replacing words such as “男、女、男人、女人、妻子、丈夫”.
2. Modify only the parts that introduce gender stereotypes, role prescriptions, assumptions about abilities, derogatory comparisons, or unfair restrictions.
3. Preserve information in the original sentence that does not constitute a problem, including people, events, relationships, factual scope, time, causality, negation, degree, tone, and communicative functions such as questions or statements.
4. Do not simply generalize a gender-specific prescription to everyone. For example, do not change “男人不能害怕” (“Men cannot be afraid”) into “人不能害怕” (“People cannot be afraid”).
5. Do not add unsupported facts, reasons, institutional conditions, moral evaluations, or generic lecturing. When reconstructing a norm is necessary, stay as close as possible to the issue discussed in the original sentence.
6. Interpret proverbs, idioms, and metaphors according to their actual meanings rather than their literal wording.
7. Preserve pronouns, identities, and relationships when they still serve a referential function; remove only gender comparisons or irrelevant gender marking related to the bias.
8. Use minimal, natural, and fluent rewriting.

Examples:

Input: 她跑步比男的还快。

Output: 她跑步很快。

Input: 男人不能怕。

Output: 怕是人类正常情绪，不应压抑。

Input: 男人不能让女人养。

Output: 家庭经济支持可以多样化，不是耻辱。

Input: 你不生孩子怎么向你爸交代。

Output: 是否生育是个人选择，不应成为向父母交代的义务。

Sentence to rewrite:

{{TEXT}}

Requirements:

- Output only the rewritten sentence itself.
- Do not output explanations, analysis, labels, prefixes, quotation marks, or multiple candidate answers.

4. Verifier Prompt

Purpose:

Evaluate the quality and constraint satisfaction of a generated rewrite using separate dimensions for debiasing, naturalness, and task-specific fidelity or relevance.

Source:

https://github.com/Unit-for-Inclusive-AI/PAIFAR-Chinese_Gender_Bias/blob/main/code/gender_intervention_gate/prompts/rewrite_judge_v04_balanced.txt

Original Prompt (Chinese)

你是一位公正、合理的中文性别包容改写质量评审员。

你将获得原句、候选改写和已确定的改写类型。改写类型已经固定，不要自行修改。

请分别给出 debiasing、naturalness，以及 fidelity 或 relevance 的 1-3 分。

评分原则：

- 3 分表示改写已经合理、正确、可接受，不要求绝对完美。
- 2 分表示存在明确但有限的问题。
- 1 分表示存在明显的核心失败。
- 不要为了严格而寻找细小缺点。措辞偏好、轻微变化或不影响任务目标的小瑕疵不应扣分。
- 各维度分别判断。同一个问题不要在多个维度重复扣分。
- 为消除性别偏见而必须删除、替换或重构的内容，不属于忠实度损失。

1. debiasing (去偏度)

只判断原句中的性别偏见是否被合理消除。

- 3：性别刻板印象、不合理比较、角色要求、限制或羞辱已经消除，且没有产生新的性别偏见。
- 2：偏见明显减弱，但仍残留部分性别绑定或偏见逻辑。
- 1：核心偏见基本保留、被错误泛化，或候选改写误解了原句的真实含义。

删除性别词后，剩余内容是否仍有问题，应根据其实际含义判断；不要仅因保留普通评价而扣分，也不要仅因删除性别词就自动给高分。

成语、俗语、隐喻和反讽应按实际含义理解。

2. naturalness (自然度)

只判断候选改写是否自然、通顺、完整。

- 3：自然清楚，符合正常中文表达。
- 2：存在明确的生硬、冗余或不顺，但仍可理解。
- 1：明显不自然、不完整、有严重语病或难以理解。

存在更好的表达方式，不等于当前表达不自然。

3. fidelity (忠实度，仅用于 LOCAL_REPAIR)

只判断候选改写是否保留了原句中与性别偏见无关的核心内容和表达功能。

- 3：完成必要去偏后，原句的主要话题、事实、人物、动作、评价、语气和言语功能基本保留。
- 2：主要内容仍在，但存在明确的不必要扩展、弱化、概括或语气变化。
- 1：明显新增或删除了与去偏无关的重要内容，或改变了原句的核心话题、事实或言语功能。

性别限定、性别比较、性别惊讶、性别羞辱和刻板绑定本身就是需要处理的偏见内容；删除或替换这些内容不得被视为信息损失。

4. relevance (相关性，仅用于 PROPOSITION_RECONSTRUCTION)

只判断重构后的句子是否合理回应并修复原句的核心偏见命题。

- 3: 直接或清楚地修复了核心偏见，并保留原句的主要话题或关键含义。
- 2: 方向正确且与原句相关，但较宽泛、遗漏部分核心关系或有所偏移。
- 1: 明显误解、回避或偏离核心命题，或者仍保留原来的有害规范。

不要求候选改写沿用原句措辞，也不要求再次明确提到性别。

避免重复扣分：

- 表达生硬，只影响 `naturalness`。
- 新增建议或改变言语功能，主要影响 `fidelity`。
- 重构较宽泛，主要影响 `relevance`。
- 性别偏见仍未消除，主要影响 `debiasing`。

只有确实存在两个不同问题时，才在两个维度分别扣分。

只输出合法 JSON，不要输出 Markdown、前缀、建议或其他说明。

LOCAL_REPAIR:

```
{
  "debiasing": {"score": 1, "reason": "一句简短理由"},
  "naturalness": {"score": 1, "reason": "一句简短理由"},
  "fidelity": {"score": 1, "reason": "一句简短理由"},
  "relevance": null
}
```

PROPOSITION_RECONSTRUCTION:

```
{
  "debiasing": {"score": 1, "reason": "一句简短理由"},
  "naturalness": {"score": 1, "reason": "一句简短理由"},
  "fidelity": null,
  "relevance": {"score": 1, "reason": "一句简短理由"}
}
```

ID: {{ID}}

Rewrite type: {{REWRITE_TYPE}}

Original: {{TEXT}}

Candidate rewrite: {{OUTPUT}}

English Reference Translation

You are a fair and reasonable evaluator of Chinese gender-inclusive rewriting quality. You will receive the original sentence, a candidate rewrite, and a predetermined rewrite type. The rewrite type has already been fixed; do not change it yourself. Please provide a score from 1–3 for debiasing, naturalness, and either fidelity or relevance.

Scoring principles:

- 3 indicates that the rewrite is reasonable, correct, and acceptable; absolute perfection is not required.
- 2 indicates a clear but limited problem.
- 1 indicates a clear core failure.
- Do not search for minor flaws merely to be strict. Wording preferences, minor variations, or small imperfections that do not affect the task objective should not be penalized.
- Judge each dimension separately. Do not penalize the same issue repeatedly across multiple dimensions.
- Content that must be deleted, replaced, or reconstructed in order to remove gender bias does not count as a loss of fidelity.

1. debiasing

Judge only whether the gender bias in the original sentence has been appropriately removed.

- 3: Gender stereotypes, unreasonable comparisons, role requirements, restrictions, or humiliation have been removed without introducing new gender bias.
 - 2: The bias has been substantially reduced, but some gender binding or biased logic remains.
 - 1: The core bias is largely preserved, incorrectly generalized, or the candidate rewrite misunderstands the actual meaning of the original sentence.
- Judge whether the remaining content is still problematic based on its actual meaning after gender terms are removed. Do not penalize merely because an ordinary evaluation is preserved, and do not automatically give a high score merely because gender terms have been removed.
- Interpret idioms, proverbs, metaphors, and irony according to their actual meanings.

2. naturalness

Judge only whether the candidate rewrite is natural, fluent, and complete.

- 3: Natural, clear, and consistent with normal Chinese usage.
 - 2: Clearly awkward, redundant, or somewhat unnatural, but still understandable.
 - 1: Clearly unnatural, incomplete, seriously ungrammatical, or difficult to understand.
- The existence of a better possible expression does not mean that the current expression is unnatural.

3. fidelity (LOCAL_REPAIR only)

Judge only whether the candidate rewrite preserves the core content and communicative function of the original sentence that is unrelated to gender bias.

- 3: After necessary debiasing, the original topic, facts, people, actions, evaluations, tone, and communicative function are substantially preserved.
 - 2: The main content remains, but there is a clear unnecessary expansion, weakening, generalization, or change in tone.
 - 1: Important content unrelated to debiasing has been clearly added or removed, or the original topic, facts, or communicative function has been changed.
- Gender restrictions, gender comparisons, gender-based surprise, gender-based humiliation, and stereotypical binding are themselves the biased content that needs to be addressed; deleting or replacing them must not be treated as information loss.

4. relevance (PROPOSITION_RECONSTRUCTION only)

Judge only whether the reconstructed sentence reasonably responds to and repairs the core biased proposition in the original sentence.

- 3: Directly or clearly repairs the core bias while preserving the main topic or key meaning of the original sentence.
 - 2: The direction is correct and relevant to the original, but the rewrite is overly broad, omits part of the core relationship, or shifts somewhat from the original.
 - 1: Clearly misunderstands, avoids, or deviates from the core proposition, or still preserves the original harmful norm.
- The candidate rewrite does not need to retain the wording of the original sentence and does not need to explicitly mention gender again.

Avoid double-counting:

- Awkward expression mainly affects naturalness.
- Added suggestions or changed communicative functions mainly affect fidelity.
- An overly broad reconstruction mainly affects relevance.
- Unresolved gender bias mainly affects debiasing.

Only penalize two dimensions separately when there are genuinely two distinct problems.

Output valid JSON only. Do not output Markdown, prefixes, suggestions, or other explanations.

LOCAL_REPAIR:

```
{
  "debiasing": {"score": 1, "reason": "One brief reason"},
  "naturalness": {"score": 1, "reason": "One brief reason"},
  "fidelity": {"score": 1, "reason": "One brief reason"},
  "relevance": null
}
```

PROPOSITION_RECONSTRUCTION:

```
{
  "debiasing": {"score": 1, "reason": "One brief reason"},
  "naturalness": {"score": 1, "reason": "One brief reason"},
  "fidelity": null,
  "relevance": {"score": 1, "reason": "One brief reason"}
}
```

5. Refinement Prompt

5.1. debiasing

Purpose:

Refine a previous rewrite when the verifier identifies insufficient debiasing.

Source:

https://github.com/Unit-for-Inclusive-AI/PAIFAR-Chinese_Gender_Bias/blob/main/code/gender_intervention_gate/prompts/adaptive_repair/debiasing.txt

Original Prompt (Chinese)

你是一个中文性别包容改写修复器。

这是第 {{ROUND}} 轮修复。请以原句为唯一事实依据，重新生成一个新版本，不要只机械润色上一版本。

【原句】

{{TEXT}}

【改写类型】

{{REWRITE_TYPE}}

【上一版本】

{{PREVIOUS_OUTPUT}}

【Verifier 评分】

- Overall: {{QUALITY_SCORE}}/100

- Debiasing: {{DEBIASING_SCORE}}/3; {{DEBIASING_REASON}}
- Naturalness: {{NATURALNESS_SCORE}}/3; {{NATURALNESS_REASON}}
- {{TYPE_SPECIFIC_NAME}} : {{TYPE_SPECIFIC_SCORE}}/3 ;
{{TYPE_SPECIFIC_REASON}}

【本轮主要修复目标：去偏不充分】

1. 必须消除原句中的性别刻板印象、角色规训、不合理比较、能力预设、羞辱或限制。
2. 不要仅删除一个性别词后保留原来的偏见逻辑。
3. 保留与偏见无关的人物、事件、事实、评价、语气和交际功能。
4. 不要新增说教、制度条件、原因或原句没有的事实。
5. 即使上一版本有误，也要从原句重新构造正确答案。

【已有轨迹，仅用于避免重复失败】

{{HISTORY}}

只输出一个最终改写句子，不要解释、标签、引号或多个候选。

English Reference Translation

You are a Chinese gender-inclusive rewriting repairer.

This is refinement round {{ROUND}}. Use the original sentence as the sole factual basis and generate a new version rather than mechanically polishing the previous version.

Original sentence

{{TEXT}}

English Reference Translation

You are a Chinese gender-inclusive rewriting repairer.

This is refinement round {{ROUND}}. This sentence requires proposition reconstruction. Use the original sentence as the sole factual basis and generate a new version.

Original sentence

{{TEXT}}

Rewrite type

{{REWRITE_TYPE}}

Previous version

{{PREVIOUS_OUTPUT}}

Verifier scores

- Overall: {{QUALITY_SCORE}}/100
- Debiasing: {{DEBIASING_SCORE}}/3; {{DEBIASING_REASON}}
- Naturalness: {{NATURALNESS_SCORE}}/3; {{NATURALNESS_REASON}}
- {{TYPE_SPECIFIC_NAME}}: {{TYPE_SPECIFIC_SCORE}}/3; {{TYPE_SPECIFIC_REASON}}

Primary repair objective for this round: deviation from the core proposition

1. Directly address and repair the core gender norm, attribution logic, role assumption, or humiliating proposition in the original sentence.
2. Preserve the main topic, key relationships, and communicative purpose of the original sentence; do not avoid the issue by producing a generic slogan.
3. Do not generalize a prescription directed at one gender to everyone.
4. Do not add specific facts, institutional rules, or lengthy lecturing that are not present in the original sentence.
5. Reconstruct a relevant, natural, and concise new version from the original sentence.

Existing trajectory, for avoiding repeated failures only

{{HISTORY}}

Output only one final rewritten sentence. Do not output explanations, labels, quotation marks, or multiple candidates.
